SUMMARY

Frontend Developer with 4+ years of experience architecting and developing scalable, high-performance web applications from scratch using React, Next.js, TypeScript, Redux, and TailwindCSS. Adept at building reusable component libraries, establishing frontend architecture, and implementing best practices for maintainable code. Proficient in integrating RESTful APIs, optimizing UI performance, and collaborating closely with UI/UX and backend teams using Node.js and MongoDB to deliver seamless, full-stack solutions.

SKILLS & CERTIFICATION

- Technical Skills:** HTML, CSS, Javascript, Typescript, React, NextJS, NodeJS, MongoDB, GraphQL, Tailwind, SCSS, Antd, Material UI, Bootstrap, ChartJS, Apexchart.
- Certifications:** Full stack development using MERN Stack

WORK EXPERIENCE

Codewave Technologies, Bangalore

Sep 2021 - Present

Lead Frontend Developer -

Mar 2024 - Present

- Leading the entire frontend team for a revenue-generating project, ensuring delivery excellence and technical direction.
- Managing a team of 4 developers, driving productivity, code quality, and collaboration.
- Setting the technical foundation for projects by defining the tech stack, tooling, and coding standards adopted company-wide.
- Established and manage a dedicated branch/team that contributes directly to business revenue.
- Spearheading critical frontend decisions, ensuring scalability, maintainability, and performance. Continue to contribute in project execution, mentoring, and stakeholder collaboration.

Senior Frontend Developer -

Oct 2023 - Mar 2024

- Architected frontend projects from the ground up using modern stacks (React, TypeScript, Redux, TailwindCSS, etc.).
- Led UI component library development to drive consistency and reusability across products.
- Acted as a key interface between clients and internal teams, handling requirement discussions and technical clarifications.
- Mentored junior developers and participated in code reviews to maintain high code quality.
- Ensured timely delivery of features and bug fixes, balancing quality with velocity.
- Collaborated with cross-functional teams to integrate APIs, design workflows, and optimize performance.

Frontend Developer -

Sep 2021 - Sep 2023

- Translated UI/UX designs from Figma into responsive, pixel-perfect web interfaces.
- Integrated REST APIs and managed dynamic frontend interactions with backend systems.
- Resolved bugs, maintained existing codebases, and improved UI/UX consistency.
- Actively collaborated within the frontend team, contributing to sprints and technical discussions.
- Delivered clean, modular, and maintainable code across multiple frontend modules.

Frontend Web Developer - Internship

Jan 2021 - Aug 2021

4Dots Agency

- Develop scalable and maintainable web applications from the ground up using React and TypeScript, adhering to modern development standards.
- Actively maintain and enhance ongoing projects by implementing new features, optimizing performance, and improving UI/UX based on feedback.
- Identify, debug, and resolve frontend issues and bugs to ensure smooth user experiences across browsers and devices.
- Write clean, well-documented, and reusable code while following team conventions and contributing to codebase consistency.
- Integrate and consume RESTful and GraphQL APIs to fetch, display, and manipulate dynamic data across frontend applications, ensuring efficient data flow and error handling.
- Collaborate with cross-functional teams including backend developers, designers, and QA to ensure seamless integration and delivery.

CLIENTS I'VE WORKED WITH

Hosted AI (AI SaaS Platform)

<https://www.hosted.ai>

- Led the frontend team and built the entire user panel from scratch using React, Vite, TypeScript, Tailwind, SCSS, Redux Toolkit.
- Architected and developed shared/common component libraries used across the application.
- Rebranded and modernized two internal dashboards for UI/UX consistency.
- Guided junior developers, established efficient workflows, and ensured scalable FE practices.
- Integrated REST APIs and optimized frontend-backend communication.

Nium Checkout (Fintech Payments Platform)

<https://www.nium.com>

- Built a full admin dashboard to track and manage all platform payments.
- Developed a JavaScript SDK for their end-to-end checkout/payment process.
- Delivered the solution using Next.js, TypeScript, Node.js, ensuring high performance and security.

M-Square (Healthcare Application)

<https://www.biontel.ai>

- Designed and developed a complete full-stack application for doctors to upload, analyze, and manage patient health records.
- Implemented authentication, RBAC, and all CRUD operations for secure data management.
- Tech stack: React + TypeScript (Frontend) and Node.js, Express, MongoDB (Backend).
- Built for crucial internal workflows, focusing on accuracy, data integrity, and usability.

CPT Markets (Multi-Sector Corporate Projects)

<https://www.cptmarkets.com>

- Designed and developed multiple websites and dashboards across different business units.
- Built reusable UI modules using React, Next.js, Ant Design, Material UI.
- Collaborated closely with design, backend, and product teams to deliver cohesive, scalable interfaces.

EDUCATION

Master of Computer Applications

Amity University

2021 - 2023
